Designer Series I Display Coolers

Website:
www.SRC.us

SRC REFRIGERATION supplies thousands of floral operations with bottom-mount, self-contained display coolers. We've built our business on listening to our customers, and providing them with exactly what they require. Here are the top four reasons why florists around the nation choose SRC.

1 Up to 100% More Lighting

Customers like you told us that the most important feature, next to refrigeration, is *lighting*. That's why we add extra lighting to our coolers, so your products are displayed with up to 100% more brightness. Better lighting means more appealing displays... and that means higher profits for your business. Colors are more vibrant, and flowers simply show better in an SRC cooler!

# DOORS	DIMENSION	ADDED BRIGHTNESS
2	54"	100% (Twice)
2	72"	100% (Twice)
3	79"	(Same)
3	103"	28%*

*additional lighting available as special order

2 1st Year FREE Ethylene Gas Filter Program With All Models

As a professional, you need to protect your investment against damage from ethylene gas. This odorless gas speeds up the aging process in flowers and plants and can be responsible for as much as 30% of losses. *Cut flowers that are not exposed to ethylene gas look fresher and last longer, resisting discoloration, wilting, spotting and dropping of petals and leaves.*

SRC is the only supplier to offer you ethylene gas filtration FREE with your new cooler!

3 Flexible Delivery Options to Suit Your Needs

We understand that this may be your first experience with ordering large equipment outside of your local area. Our in house delivery and tracking coordinators will help guide you from start to finish. Coolers are large and heavy, yet extremely fragile. They require careful handling to avoid the many potential problems that can occur en route to your location, and during unloading. For those customers who have the ability to properly handle and receive coolers, we ship via common carrier. For customers requiring inside delivery, we arrange all deliveries with one company, North American Van Lines (NAVL). NAVL trucks are equipped with *air-ride suspension*, coolers are *blanket wrapped*, and NAVL professional drivers are fully insured for liability and property damage while at your location. *It costs a little more, but it is definitely better for your cooler to travel with NAVL from beginning to end!*

4 "Hassle Free Delivery Program"

Even though we work hard at preventing problems, not every delivery goes exactly as requested. When items are either missing or damaged you will not be asked to work with the delivery company to resolve the problem as most companies require. Simply make a notation on the freight bill and fax it to SRC. We will promptly handle, resolve and keep you informed.

5 Superb Warranty Policy

Standard on all SRC equipment: 5 year compressor motor, one year parts and labor. We will go one step beyond and coordinate your warranty service if necessary. Many florists don't know who to call if problems develop. We want to be there for you. Warranty bills will be coordinated, authorized and paid by SRC. Your time and resources will not be tied up waiting and hoping for reimbursement after the fact.
