Since 1980...

SRC Refrigeration has been satisfying the refrigeration industry with "quality" standard and custom floral coolers. Our Company mission is **"Striving to Exceed Your Expectations"**.

We Invite You To Visit Our Factory...

We would enjoy showing you our modern facility. Our recent investment in new production machinery allows SRC to continue its reputation for offering the highest equipment standards and shortest lead times.

The SRC Team Makes It Easy...

Our knowledgeable and professional sales staff can offer helpful suggestions in selecting the right equipment for your store and within your budget. All Designer Series II, II+, III and IV coolers are engineered for accuracy and years of dependability. Drawings of your cooler are then sent to you for review and approval before your order is processed. Our job coordinators see to it your order is completely filled and arrange all delivery and/or installation requirements with you. You'll enjoy the personal touch from beginning to end.

Innovative Ideas...

For years, SRC has been the leader in offering "upgraded" refrigeration systems. Our patented Surround Air® refrigeration system, (available on all Designer Series II, II+, III and IV) extends freshness by gently bathing the flowers in generous humidity.

"Surround Air®" systems are the best because they create a total relationship between our cabinet, the refrigeration system and your flowers. Each system component has been specially chosen to provide the optimum balance for each of our Designer Series II, II+, III and IV models. We take into consideration proper air flow, equipment cycle rates and both the temperature and humidity levels achieved. Improve customer service and profits with "Surround Air®" refrigeration systems.

"BEST" in Floral Refrigeration

"Surround Air®" (U.S. Patent and Trademark offer registration #2,377,379)

Since 2000, SRC is equipping ALL coolers with its new **"EGF", Ethylene Gas Filter** including the first year replacement filter program. By removing harmful ethylene gases, you extend flower life and increase your profits.

No Hassle Warranty...

SRC pays all in-warranty bills directly to the refrigeration company. We do not ask you to pay the contractor and then seek reimbursement from us.
